Christmas Tree Care Guide

A few simple steps to help keep your real Christmas tree looking its best throughout the festive season.

Cut Christmas Trees

Trim the base
Cut 2–3cm off the bottom before placing in a stand to help it take up water.

Keep it well watered
Check the water level daily. A freshly cut tree can drink up to a pint of water a day.

Keep away from heat
Place your tree away from radiators, open fires and direct heat.

Use a sturdy stand
Make sure your tree is secure and the stand holds plenty of water.

Pot Grown Trees

Keep outdoors
Keep your tree outside until you are ready to decorate it.

Bring inside gradually
If possible, move to a cool place (such as a garage or porch) for a few days before bringing it indoors.

Keep the compost moist
Water regularly, but don't allow the pot to sit in water.

Back outside after Christmas
If you'd like to replant your tree, keep it outside and acclimatise it gradually to the colder weather.

We would like to take this opportunity to wish you a very Merry Christmas & a Happy New Year!
